Title: Introduction new Everpure Fyberdyne water filter

Herby I would like to inform you that we have introduced a new generation Everpure water filter, using the latest 'Fyberdyne' technology.

This filter will be available in two sizes; 2FC-S & 4FC-S and fits on the standard QL3 series filter head that is now being used.

Currently we are using two different Everpure water filters:

- 4CB5-S filter for hot water systems
- 4H filter for cold water systems

Filter type	VMN	SAP	Flow rate l p/m	Filtration	Capacity/l	lifetime/months
4CB5S	EV961726	55032174	6,3	5 µm	22710	12
4H	EV960100	55032301	1,9	0,5 µm	5700	12

With the introduction of the Everpure Fyberdyne carbon block filters, with an effective performance depth filtration -up to 0,2µm Vitens and 0,5 µm NSF certified-, removing Chlorine and organic odors with a minimum loss of water pressure, we will have one filter for all water systems. For water softening, Brita Purity C hydrogen softeners will remain available.

On top of that the maximum operating time is extended from 12 to 18 Months, which will result in a lower cost price per year. When used for a cold water system, the maximum operating time will remain 12 Months.

Filter type	VMN	SAP	Flow rate l p/m	Filtration	Capacity/l	lifetime/months
2FC-S	EV969176	55120568	5,6	0,2µm	22710	18
4FC-S	EV969231	55120569	9,5	0,2µm	56780	18

Filter type 4CB5-S and 4H will be phased out in the course of this year, so please adapt your systems accordingly.
